MEDICINAL.

This important organ weighs but about three pounds, and all the blood in a living person (about three gallons) passes through it at least once every half hour, to have the bite and other impurities strained or filtered from it. Bile is the natural purgative of the bowels, and if the Liver becomes torpid it is not separated from the blood, but carried through the veins to all parts of the system, and in trying to escape through the pores of the skin, causes it to turn yellow or a dirty

and in trying to escape through the pores of the skin, causes it to turn yellow or a dirty brown color. The stomach becomes diseased and Dyspepsia, Indigestion, Constipation, Headsche, Biliousness, Jaundice, Chills, Malarial Fevers, Piles, Sick and Sour Stomach, and general debility follow. MER-RELL'S HEPATINE, the great vegetable discovery for torpidity, causes the Liver to throw off from one to two ounces of bile each time the blood passes through it, as long as there is an excess of bile; and the effect of even a few doses upon yellow complexion or a brown, dirty locking skin, will astonish all who try it—they being the first symptoms to disappear. The cure of all billous diseases and Liver complaint is made certain by taking Hepatine in accordance with directions. Headsche is generally cured in twenty minutes, and no disease that arises from the Liver can exist if a fair trial is since. The cure of all siles and the civer can exist if a fair trial is since. from the Liver can exist if a fair trial is given. Take no pills when you can get Hepstine at the same price. It is freely stated in London society that Dean Stanley, who recently visited this country, is about to join the Church of Rome. His sister, who was converted many years ago, has, site; the death of his wife, assumed great sway over his mind, and has turned it toward the study of Roman Catholicism, especially ca enunciated in the works of Fonelon.

The will of the late R. S. Borroughs, the millionaire who died at Albion, N. Y., recently, devises all of bis property, estimated at six or seven milion dollars, to his widow, three sur viving children and two grand children. Mr. Byrd Warwick, of Richmond, married a daughter of the deceased, and his wife's share of this fortune will probably amount to a million del

The death of a New York man from pymnia, or blood poisoning, occasioned, as the attend ing physician decides, by poisonous matter received from the outside of silver coin or nickles, which he had tested by by biting, is another illustration of the case with which poisonous virus is transmitted. One of the New York Health Board says similar instances of infection are alarmingly common.

The outlook for the low country of South Carolina is said to be growing brighter. It is thought that hereafter the cultivation of rice and long cotton in that section of the State will be regularly prefi able. The entire crop of rice in the United States last year is said to have been only 128,000 tierces, whereas South Carofina alone, under favorable conditions, is capa ble of producing 200,000 tierces.

Edison still insists that his electric light is a success, and that the light will be furnished at a cost one third less than is now paid for gas. This seems to be a concession that his loven tion will not accomplish what was first claimed, that it would reduce the cost of light to less than half the price of gas. It is noted, too, that the time for exhibiting the electric light at Menlo Park in a convincing way has been yet

farther postponed. We thought March went out with a great deal of what might be called unnecessary display, but we guess we were not around when it was doing its worst, according to the following from the New London Telegram: "With a roar as terrible as the anger that inspired it, with bristling mane and flishing eges, the libe March takes his snow bound and wind swept way off the path of the year and goes to growl out his life amid the bleached bones of countless dead Lecs." - Danbury News.

Man is a noble creature. On a Sunday morning he will come down town and spend 60 cents at a barber shop, making himself look sweet. He will spend as much more on a game of billiards-also get his boots blackened-buy two eigars and two drinks for himself and a friend-making in all about \$2 for his personal gratification. He will then buy a bex of straw berries for 25 cants, and go up home and help eat them. The strawberries show that he is ready to deny himself, and that he never for gets his darling little wife. - New Orleans

Picamme. An aged Lothario, with wintry looks and fearfully shrunk shacks, Herman Rose by name, and Miss Emma Hohmann, of eighteen summers, have just made sentimental matters in St. Lonis boom. Miss Hohmann is the daughter of a wealthy widow in St. Louis, and is said to be of varied accomplishments, speak ing flaently three foreign languages, for instance. Rose, on the other hand, is not only as poor as Job's turkey, but was the young lady's music teacher. They eloped three weeks ago and are now in Evansville, Ind.

Do Animals Reason?-A somewhat sin gular incident happened yesterday at the corner of South and German streets, which attracted a large number of spectators, few of whom failed to appreciate the situation. At this corner is the office of the President of that humane organization, the Society for the Prevention of Cruelty to Animals. On the from: of the offie bangs the eign of the Society, bearing upon its face the picture of a cruel driver beating an overloaded dray horse. It was about 2 P.M. yesterday, and the streets were thronged with business men, when a hors: and cart were driven down South street, the horse considerably the worse for wear, the cart very muce dilapidated, and somewhat overloaded. As the horse reached the corner he slightly raised his head, gave one glance at the humane society's sign, and without more ado laid himself down on the pavement in barness, his head toward the sign and his tail toward the street. It was fancied by those who witnessed the performance that the horse heaved a sigh of relief as he reached the pave ment and lay under the shadow of the society. Tender hands raised the animal from the ground though he looked constantly as if he would pre fer to remain where he was, and seemed to think that he had fallen into good company.
